

Snowflake Symmetry

DIRECTIONS:

- A hexagon is folded into sixths and this pattern is used to cut out the black parts. Draw what the snowflake will look like when it is unfolded.

Snowflake Symmetry

DIRECTIONS:

- Cut out the hexagon below.
- Fold it in half and then in thirds so that only the design is showing.
- Cut out the black sections.
- Carefully unfold the snowflake and compare it to your prediction.

Snowflake Symmetry

DIRECTIONS:

- This is what the unfolded snowflake will look like.
- How many lines of symmetry does this snowflake have?
- Use a colored marker to draw in all of the lines of symmetry.
